--- Understanding Ear Training and Sight Singing

What is Ear Training? Ear training involves developing the ability to identify pitches, intervals, chords, rhythms, and other musical elements by ear. It enables musicians to recognize and understand music aurally, which is critical for improvisation, transcription, and performance accuracy.

What is Sight Singing? Sight singing is the skill of reading and singing music at first sight without prior preparation. It requires strong reading skills, an internal sense of pitch, and rhythmic accuracy. Sight singing often incorporates solfège (do, re, mi, etc.) to internalize pitch relationships.

The Interconnection Between Ear Training and Sight Singing Both skills are closely related; developing one enhances the other. For example, understanding intervals through ear training makes sight singing more intuitive, while sight singing reinforces pitch recognition and internalization.
